What is Cialis Once a Day?

Cialis Once a Day is an inevitable revolution in the field of ectiles disorders remedies. It is the only comprimique you don't have to take just before intercourse. Like the classic Cialis, this micament contains the active ingredient Tadalafil. It inhibits the action of an enzyme that charges the blood of the penis. By blocking this enzyme, blood stays longer in the udder in the event of sexual stimulation, thus enabling a firmer erection.

What is this micament?

Cialis Once a Day is prescribed to men suffering from disorders of the erection. Means the the incapacitated erection disorders ' obtain or maintain an erection. Ectiles disorders are fruents and are often caused by a disruption of the blood flow to the penis. Cialis Once a Day cancels these problems for better quality erections.

How to use Cialis Once a Day?

The use of Cialis Once a Day is simple: just take a daily comprimpar, fixed schedules. It is therefore not necessary to take the micament just before intercourse, as is the case for other micaments of ectiles disorders. Your sex life wins so spontaneously if you take comprimchaque day, you can have sex anytime. No need to plan ahead! This remedy doesn't work in case of sexual stimulation. It causes no erection without reason.

Dosage

Cialis Once a Day is available in 2.5 mg and 5 mg variants. The choice of dosing process the more adaptvos needs. The determination of dose is usually 2.5 mg. The dosage of Cialis Once a Day also conseillst the following:

Adults from 18 years old: 1 comprimdu dosage prescribed per day. This micament of disorders of the

section does not of satisfactory olographic rultats? See the process. It may then prescribe a dosage more ev never take double dose for more effect. This may cause serious side effects. See the manual for more information about the dosage.

Side effects

This micament of the ection disorders can cause side effects, such as:

Blush; Headaches from you; Dizziness; Muscle pain; Upset stomach or intestinal pain; Nose Bob see the instructions for a complete overview of side effects possible.

What are the contraindications of Cialis Once a Day?

Cialis Once a Day is not all persons. Do not use this micament if:

You are a woman, or if you are less than 18 years; You are hypersensitive to tadalafil or one of the other components of this micament; You use micaments that contain nitrates or nitric oxide libent (the process knows what micaments are concern); You suffer or have suffered from probles of voltage Ajibade, heart, blood, or eye, or victim of congestion crale.
